**Natural Beauty and “Pura Vida” (Pure Life) Atmosphere**

Named the world’s happiest country, accordingly to the 2009 and 2012 Happy Planet Indexes, it possesses a lot of factors that contribute to an overall fantastic quality of life.

Over the past ten years, tourism has increased several fold. The national tourism market maintains an increasing annual growth rate. More than one million tourists visit Costa Rica every year, of which about half come from the USA, 16% from Europe and 36% from other countries.

**Public Health System Is Among The Best In The World**

**Tropical Weather Year-round, Mountains, Rainforests, Beaches**

Great weather year-round, with an average temperature of 89°F on the Pacific Coast. Tropical and mountain rainforests, seven active and dormant volcanoes, and two coastlines make Costa Rica one of the preferred ecological and nature hot spots.

Costa Rica is home to 5% of the Earth’s known species with over 9000 species of plants, including 1400 species of orchids, in a country the size of West Virginia, USA.

According to a recent report by the Foro Económico Mundial (World Economic Forum), Costa Rica is the most technologically developed country in all of Central America. In addition, it is also the seventh most developed country in Latin America and the Caribbean. Of the ranked nations, Costa Rica’s highest mark was in exports of advanced technology, where it ranked #12.
